Version 0.8.0

1. Introduction
2. Over-sampling
3. Under-sampling
4. Combination of over- and under-sampling
5. Ensemble of samplers
6. Miscellaneous samplers
7. Metrics
8. Common pitfalls and recommended practices
9. Dataset loading utilities
10. Developer guideline
11. References

User Guide

Edit this page

- 1. Introduction
  - 1.1. API's of imbalanced-learn samplers
  - 1.2. Problem statement regarding imbalanced data sets
- 2. Over-sampling
  - 2.1. A practical guide
    - 2.1.1. Naive random over-sampling
    - 2.1.2. From random over-sampling to SMOTE and ADASYN
    - 2.1.3. Ill-posed examples
    - 2.1.4. SMOTE variants
  - 2.2. Mathematical formulation
    - 2.2.1. Sample generation
    - 2.2.2. Multi-class management
- 3. Under-sampling
  - 3.1. Prototype generation
  - 3.2. Prototype selection
    - 3.2.1. Controlled under-sampling techniques
      - 3.2.1.1. Mathematical formulation
    - 3.2.2. Cleaning under-sampling techniques
      - 3.2.2.1. Tomek's links
      - 3.2.2.2. Edited data set using nearest neighbours
      - 3.2.2.3. Condensed nearest neighbors and derived algorithms
      - 3.2.2.4. Instance hardness threshold
- 4. Combination of over- and under-sampling
- 5. Ensemble of samplers
  - 5.1. Classifier including inner balancing samplers
    - 5.1.1. Bagging classifier
    - 5.1.2. Forest of randomized trees
    - 5.1.3. Boosting
- 6. Miscellaneous samplers
  - 6.1. Custom samplers
  - 6.2. Custom generators
    - 6.2.1. TensorFlow generator
    - 6.2.2. Keras generator
- 7. Metrics
  - 7.1. Classification metrics
    - 7.1.1. Sensitivity and specificity metrics
    - 7.1.2. Additional metrics specific to imbalanced datasets
    - 7.1.3. Macro-Averaged Mean Absolute Error (MA-MAE)

- 7.1.4. Summary of important metrics
- 7.2. Pairwise metrics
  - 7.2.1. Value Difference Metric
- 8. Common pitfalls and recommended practices
  - 8.1. Data leakage
- 9. Dataset loading utilities
  - 9.1. Imbalanced datasets for benchmark
  - 9.2. Imbalanced generator
- 10. Developer guideline
  - 10.1. Developer utilities
    - 10.1.1. Validation Tools
    - 10.1.2. Deprecation
    - 10.1.3. Testing utilities
  - 10.2. Making a release
    - 10.2.1. Major release
    - 10.2.2. Bug fix release
- 11. References
